PROFILE

I've spent over a decade finding the gaps between enterprise systems and the people stuck using them, then building what's missing. At MOREgroup, I created the VUES suite: 6 production applications that cut planning time by 80% and saved over \$400K annually. I didn't do it by writing every line of code myself. I did it by understanding the problem deeply, architecting the solution, and using AI to accelerate development. My background spans architectural drafting, resource management, media lab development, and product ownership, which means I understand both the people side and the systems side.

EXPERIENCE

Digital Experience Architect & Product Owner

MOREgroup (formerly Huckabee)

July 2022 - Present

- Designed and built VUES, a suite of 6 production AI applications used daily by cross-functional teams. End-to-end ownership: user research, interface design, full-stack development, deployment. 130+ API endpoints, 55+ database tables, serving 800+ person organization.
- LegislationVUE - Python/FastAPI backend processing 20,000+ legislative documents via Azure OpenAI GPT-4. React frontend with real-time search across 6 state databases. Eliminated \$40K+/year in legal consulting costs.
- PlanVUE - Go/HTMX application managing 200+ active projects with 25+ PostgreSQL tables. Claude AI for scope analysis, role-based access control, automated PDF generation. Achieved 80% efficiency gain (5 days to 1 day).
- InitiativeVUE - Full-stack Go application serving 50+ concurrent users. Real-time WebSocket updates, multi-level approval workflows, 30+ RESTful endpoints, 15+ DB tables. Claude AI for automated status reporting.
- FacilityVUE - Multi-tenant Go platform supporting 100+ school districts with isolated PostgreSQL schemas. 40+ API endpoints, real-time notifications, comprehensive audit logging. Preparing for commercial release.
- SharePointVUE - Automated testing framework scanning 500+ pages/run. Playwright-based validation, WCAG 2.1 AA compliance checking, broken link detection. Claude AI analyzes accessibility issues.

Stack: Go, Python, TypeScript, React, Next.js, FastAPI, HTMX, PostgreSQL, Azure SQL, Docker, Playwright | AI: Claude, Azure OpenAI GPT-4, RAG pipelines

Resource Manager → Media Lab Manager → Digital Experience Designer

Huckabee | A MOREgroup Brand

July 2013 - July 2022

- 9 years of progressive growth building internal tools, knowledge management platforms (\$30K+ annual savings), and media production systems. Foundation for understanding workflow pain points and translating user needs into technical solutions.

SIDE PROJECTS

Tenant Wise

github.com/d4vid4nderson/Tenant-Wise

Personal Project

- Next.js 14 SaaS for Texas landlords. Supabase backend with Row-Level Security for multi-tenancy. Claude AI generates Texas Property Code-compliant legal documents. Stripe subscriptions, SignWell e-signatures, automated email workflows.

Stack: TypeScript, Next.js, React, Tailwind CSS, Supabase, Claude AI, Stripe, SignWell API

TECHNICAL SKILLS

Design & UX

User research, interaction design, prototyping, design systems, accessibility (WCAG 2.1 AA), Figma workflows

AI & LLMs

Claude Code, OpenAI GPT Codex, Azure Foundry, Prompt Engineering, RAG Pipelines, AI UX patterns, conversational interfaces

Languages & Frameworks

TypeScript, React, Next.js, Go, Python, FastAPI, HTMX, Tailwind CSS

Developer Tools & Infrastructure

PostgreSQL, Docker, REST APIs, WebSockets, Playwright, automated testing, CI/CD pipelines
